Microsoft

## Impact:

Multimedia Ads gave Imkey an instant uplift in performance by benefiting from human beings' preference for visual decision-making – and their greater engagement with an idea that they can see. 20% Incremental impressions 5% Incremental

conversions

554%

Incremental viewthrough conversions

"Using Multimedia Ads is a way for us to stand out in search results by giving people a powerful first impression of what we can help their resumé look like. We might not have a beautiful beach to promote, or something obviously visual, but images still give us stand out and improve our click-through rate."

Imkey's Search Consultant, Heini van Bergen
